There is really not much to say here—this is an excellent piece of work. The research is comprehensive; the findings are well-organized and well-written; the treatment is sufficiently deep while also using the concepts seen in class very well. There are minor notes and tweaks here and there in the document but ultimately they are small refinements that merely add polish to the work. Do toss your hat in the ULRA ring if your schedule permits!

One spoiler is that the questionnaire on Dr. Hellige's cognitive psychology talk is nowhere to be found. Not super huge because your overall understanding is well-demonstrated in the paper, but still we should acknowledge that this was requested.
