Use version control effectively.

Meet all designated deadlines.

HW HW HW HW HWa HWb **Totals** 0902 0925 1021 1030 1127 1204 1204 Far Appreciate and express the art and science of interaction design, including its theories, principles, methodologies, and role in software design and development. **1a** Understand and express how interaction design relates to mental models. + + Understand and describe core interaction design concepts: usability 1b metrics; interaction design guidelines, principles, & theories; interaction + styles; and affordances & natural mappings. 0 2 Understand and report on how humans behave and interact with the user interfaces of real-world systems and software. Conduct and document a real-world study of how a cohort of users 2a responds to a particular user interface, including but not limited to + + capturing and prioritizing usability metrics and correlating results to mental models and interaction design theories. Effectively use: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings to +make appropriate, well-founded interaction design decisions. 3 Demonstrate the fundamentals behind designing and implementing user interfaces. 3a Know and understand how user interfaces are constructed, especially + the model-view-controller (MVC) paradigm. 3b Know and understand event-driven programming. + 4 Follow academic and technical best practices throughout the course. 4a Write syntactically correct, functional code. 4b Demonstrate proper separation of concerns, especially MVC.
